

IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER

Pottawatomie County Development Auth Did Not Meet Monitoring Requirements

Our water system violated water requirements pertaining to the contaminant(s) of concern listed below. Although none of these violations are considered emergencies, as our customers, you have a right to know what happened and what we are doing, or have done, to correct these violations. Customers are not at risk and there is no reason to suspect any potential adverse health effects. Alternative water supplies are not needed.

We are required to monitor your drinking water for specific contaminants on a regular basis. Results of regular monitoring are an indicator of whether your drinking water meets health standards. During the following monitoring periods, we did not monitor or test for the following contaminants, and therefore cannot be sure of the quality of your drinking water during that time:

<u>Type of Sample(s)</u>	<u>Monitoring Period(s)</u>
CHLORINE (T. COLIFORM)	6/1/2026 To 6/30/2026
TOTAL COLIFORM	6/1/2023 To 6/30/2026

What should I do? Nothing needs to be done. The drinking water is fine as it is.

What happened? What is being done? The required drinking water testing was inadvertently not conducted during the applicable month. This omission was identified and the testing requirements and schedule have been reviewed to ensure that all required testing is completed within the established timeframe going forward.

We anticipate resolving the problem by this date: The issue was resolved immediately upon identification; therefore, no future resolution date is anticipated.

For more information please contact: Robbie Fitzgerald at 405-273-8064 or Matt Bolin at 405-777-8829. Office address: 17508 Bethel Rd. Shawnee, OK 74801.
